2v2 + 2 Target Players

SETUP: 20X20 yard area. 3 teams of 2 players. One team serves as target players, outside opposite ends.
INSTRUCTIONS: Play 2v2 in the middle. The team in possession scores by passing to the outside target players and receiving the ball back. When a team scores 3 points the losing team becomes target players.
COACHING POINTS: Execute the cycle of possession. When you pass to the target player each attacker must immediately run to provide passing options on the right and left sidelines (create maximum width). One defender must guard an attacker, and the other defender must pressure the ball outside the square (go outside the box), and the target player must take a touch to the side to escape the pressure. Target players must move laterally to provide safe passing angles.
