Rondo 5 - 4v1 Central Target

SETUP: 15X15 yard square with a 4X4 yard square in the middle. 4 attackers vs 1 defender. One attacker is the target player in the central square.
INSTRUCTIONS: The three attackers on the outside possess the ball and score by passing to the central target player. They get a point when the target player passes back to an outside player. The defender scores by also passing to the target player and receiving it back (give-&-go). The defender is never allowed inside the small square. Rotate defender and target player when attackers or defender gets 3 or 4 points.
COACHING POINTS: Get open by providing your teammate a big angle of support. Good first touch. Take a touch to the side to create time and space to pass, or turn and face away then take a touch to the side. Accurate pass. Don't rush to pass to the target - change the point of attack quickly so you have a safe pass to the target. If the defender wins the ball all attackers must rush to win the ball back.
